

WeBWorK Quiz

Information Sheet

Set Name: **WeBQuiz-4**
Time Allowed: **50 minutes**
No. of problems: **around 15** (Most of them are MCs)
Due Date: **4 April, 2018 11:59PM**

This is a **take-home** quiz.

You will be allowed a total of **THREE** submissions for the entire quiz.

Do not submit answers question by question! When you make one submission for marking, it counts as one attempt for the entire quiz, even if you have answered just one question.

Quiz Syllabus:

Analytic Trigonometry

- Your quiz page has a time-display to show you roughly how much time is left for you. The computer starts timing you from the moment you click into the quiz page. The computer will give you signals when you are about to run out of time. If you have not yet submitted when you receive a warning that time is almost up, you should use your first attempt immediately even if you have not finished the entire quiz.
- You should never use the BACK button on your browser. Its use will create inaccurate readings on the time-display, since the time-display is for your easy reference and is not what the computer uses to time you. Use the links and buttons available within WeBWorK to go from page to page.
- Do not open two WeBWorK windows or tabs at the same time while you're taking the test.
- WeBWorK will start urging you to finish when there are **90 seconds to go**. It will stop accepting answers either after you have pushed the Grade button three times, or after time has run out.
- Note however that most questions in your WeBWorK contain computer-generated numbers. You should expect this to be the case also for the quizzes.
- Every time you push the Grade button, you will get an update of which problems you have answered. WeBWorK will remember the best answer you submitted for each problem in your final total. If you submit an incorrect answer for a problem to which you have previously submitted a correct answer, that problem's points won't appear in that particular submission, but will appear in your final total. There is no partial credit possible on any of the exam problems.
